Arizona Corporation Commission

DOCKETED

NOV 7 2011

Nov 2, 2011

Commissioner Paul Newman  
1200 W. Washington St.  
Phoenix, AZ 85007

DOCKETED BY

*10886*

Dear Commissioner Newman,

As an APS customer and an Arizonan who is very concerned about the costs of energy and energy waste, I strongly urge you to support the adoption of both increased energy efficiency measures and decoupling in the APS rate case.

Our current system isn't working for me or others who are interested in conserving energy and lowering utility bills. We are sending billions of dollars and many jobs out of the state to buy fuel for our energy needs. If we don't fix the problem now, we are setting ourselves up to pay higher energy bills because utilities will buy more fuel from out of state and build more infrastructure, including power plants, which we will ultimately pay for on our utility bills. To make matters worse, the current system financially rewards utilities for selling us more energy than we need. This results in wasteful energy use and the construction of more power plants, which we all have to pay for.

The Commission and the utilities should be helping Arizonans lower energy bills. We can do this through increased energy efficiency and through decoupling, which removes the utility incentive to waste.

This state is primed, naturally, to take advantage of solar energy and frugality is standard course here. We have NO need to request outside energy if we allow development of solar energy. We all a duty to engage the most frugal energy policies and to demand the development of self sustaining solar units.

As an APS ratepayer, I ask that you support both decoupling and energy conservation in this rate case.

Thank you for your consideration.

Sincerely,

Mrs. Lorraine Specht  
19811 N 6th Dr  
Phoenix, AZ 85027-4408
